

Andrew Johnson B Eng. (Mechanical)
Senior Engineer, Energy Services
Aurecon

Andrew is a senior power generation engineer within Aurecon's Energy Services team. He is an Australian Citizen who studied Mechanical Engineering at the University of Queensland, Brisbane. After graduating, Andrew joined the Energy Services team at Connell Wagner in Brisbane, which later merged with two South African consultancies to become Aurecon. He has spent much of his career working outside of Australia, including two years on secondment in the United Kingdom, and almost four years in Botswana and South Africa.

He joined Tshwane Energy's power generation team as a Project Leader when it consisted of only four people. He has played an integral part in winning and delivering of Aurecon's power generation projects throughout African, which has contributed to the substantial growth of the Tshwane power generation team.

Andrew joined SANEA in 2015 and assisted in organising the Youth Energy Leadership Forum (YELF) events which were held in 2016. He is passionate about youth development and remains involved in SANEA's youth development initiatives in 2017.

Andrew is currently studying a Masters of Business Management and Administration (part-time) at the University of Stellenbosch.
